

**Digital infrared thermometer with fibre optic
designed for the glass industry**

IS 50-LO/GL

- Adjustable temperature ranges between 600 and 1800°C
- High accuracy
- Ambience up to 250°C without cooling
- Robust design
- Simple parametrizing
- Integrated air purge
- Quick release for optical head
- Two wire technique

The pyrometer **IS 50-LO/GL** is specially designed for the glass industry. It is used for the temperature measurement of glass in tank, working end, forehearth and feeder. Additional applications are the measurement of brickworks in regenerator and tank.

Using a robust fiber optic cable (length up to 30 m) enables the use

of the instrument in an ambient temperature up to 250°C without cooling.

The IS 50-LO/GL is a digital pyrometer in **two wire technique**. This technique combines the high accuracy of the digital signal processing with the simple connection and operating with two wires.

The emissivity is exactly adjustable at the device, additionally any sub range and the response time via service interface. The instrument is equipped with a test function to check the correct connection.

Typical Applications

Glass temperature measurement

- in forehearth
- in feeder
- in tank

Temperature measurement of brickworks

- tank side walls
- tank roof
- in regenerator

The different sighting tubes enable to adapt the pyrometers optimally to the different applications. For an easy installation of the pyrometers it is possible to separate the optical head and converter from the fiber optic.
